**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-6 are allowable.
2. Claim 1 is allowable because, prior art of record taken alone or in combination, fails to disclose or render obvious a semiconductor wafer inspection device comprising, a first optical sensor that receives narrowly scattered light scattered with a scattering angle that is narrower than a prescribed angle and detects intensity of said narrowly scattered light; a second optical sensor that receives widely scattered light scattered with a scattering angle that is wider than a prescribed angle and detects intensity of said widely scattered light, and an identification means that, if the intensities of said narrowly scattered light and said widely scattered light are both within said sizing range, identifies the type of the laser light scatterer in accordance with both the first PLS-based size and the second PLS-based size, wherein PLS is defined as Polystyrene Latex Sphere, in combination with the rest of the limitations of claim 1.
3. Claims 2-5 are allowable because they are dependent on claim 1 or an intermediate claim.
4. Claim 6 is allowable for the same reasons of allowability of claim 1 above and because it consists of a method for using the device of claim 1.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Priority***

6. Acknowledgment is made of applicant's claim for foreign priority based on an application 2004-117910 filed in Japan on 13 April 2004, and, PCT/JP2006/007120. It is noted, however,

that applicant has filed **INCORRECT** certified copies of the Japanese applications as shown below. Appropriate correction is requested.
